PROFESSIONAL SUMMARY

Information Science & Engineering graduate with a strong foundation in Core Java, Object-Oriented Programming, and Data Structures & Algorithms. Additional hands-on experience in full-stack development, having built, tested, and optimized 15+ production REST APIs across the SDLC. Skilled in relational database design and integration (SQL, JDBC) and functional/regression testing. Seeking to apply strong programming fundamentals and problem-solving ability as a Software Engineer / Full Stack Developer.

TECHNICAL SKILLS

Core Java & OOP: Java (Core), Object-Oriented Programming, Collections Framework, Exception Handling, Multithreading, Spring MVC

CS Fundamentals: Data Structures & Algorithms (LeetCode: 25+ solved — 15 Easy, 7 Medium, 3 Hard), Operating Systems, Computer Networks, DBMS

Database & Backend: JDBC, SQL (MySQL, PostgreSQL), MongoDB, DBMS, REST API Design, JWT Authentication, RBAC

Tools & Practices: Git, GitHub, Postman, Agile/SDLC, Unit / Functional / Regression Testing, Debugging

Web Technologies: JavaScript (ES6+), React.js, Node.js/Express.js, HTML5, CSS3

Data Analysis / ML: Python, Pandas, Scikit-learn

INTERNSHIP EXPERIENCE

Web Development Intern — Gully Systems Pvt. Ltd., Bangalore

Jan 2026 – Jun 2026

- Engineered and deployed 15+ production REST APIs (Node.js/Express.js) applying OOP and RESTful design principles across a multi-tenant SaaS platform serving multiple colleges, following Agile/SDLC practices.
- Implemented JWT-based authentication and role-based access control (RBAC) with PostgreSQL schema isolation for secure, tenant-level data management.
- Optimized 20+ SQL queries via systematic debugging and Postman-based testing, and conducted functional/regression testing before each deployment to ensure production-ready quality.

PROJECTS

ERP System – Inventory & Authentication Module

2024

Java, JSP, JDBC, MySQL

- Designed and developed an MVC-based inventory and authentication module using Java Servlets and JDBC, solving manual inventory-tracking inefficiencies.
- Applied OOP principles and structured exception handling on a 3NF-normalized MySQL schema; wrote and executed unit/integration test cases across the SDLC.

Placement Management System

2026

Java, Spring MVC, PostgreSQL

- Collaborated in a team to design and develop a college Placement Management System using Spring MVC and PostgreSQL, structured across User, College, Admin, Placement, and Student modules.
- Applied Spring MVC architecture and OOP principles to implement modular, role-based functionality across admin, college, and student workflows.
- Designed the relational PostgreSQL schema to manage student, college, and placement-drive data across modules.

Gully Connect – Multi-Tenant Alumni Networking Platform

2026

React.js, Node.js, Express.js, PostgreSQL

- Architected a multi-tenant SaaS with isolated PostgreSQL schemas per college, applying database normalization principles to prevent cross-tenant data leakage.
- Developed and tested 12+ REST APIs with dynamic search, achieving sub-2-second response times; deployed on Netlify with live usage across multiple colleges.

Personalized Diet Recommendation System — B.E. Major Project

2025

Python, Scikit-learn, Pandas

- Built an end-to-end machine learning pipeline to generate personalized diet recommendations from clinical and BMI datasets, achieving 85%+ prediction accuracy.
- Performed data cleaning, preprocessing, and feature correlation analysis on clinical indicators to improve model reliability as part of the final-year major project.

EDUCATION

2022 – 2026

2020 – 2022
